Research Papers

Forest-tundra water balance signals traced by isotopic enrichment in lakes
J.J. Gibson 1
Modelling of maximum daily water temperatures in a small stream using air temperatures
D. Caissie, N. El-Jabi and M.G. Satish 14
Water balance comparison between a dry and a wet landfill — a full-scale experiment
S.T.S. Yuen, Q.J. Wang, J.R. Styles and T.A. McMahon 29
Detecting cumulative watershed effects: the statistical power of pairing
J.C. Loftis, L.H. MacDonald, S. Streett, H.K. Iyer and K. Bunte 49
On the representation of hyetograph characteristics by stochastic rainfall models
D. Koutsoyiannis and N. Mamassis 65
The importance of the spatial patterns of remotely sensed soil moisture in the improvement of discharge predictions for small-scale basins through data assimilation
V.R.N. Pauwels, R. Hoeben, N.E.C. Verhoest and F.v.P. De Troch 88
Automatic calibration of a distributed catchment model
K. Eckhardt and J.G. Arnold 103
Development of a technique to determine adequate sample size using subsampling and return interval estimation
L.S. Porth, D.C. Boes, R.A. Davis, C.A. Troendle and R.M. King 110

Vol. 251 Nos. 3–4 **October 1, 2001**

Special Issue: Pedotransfer Functions in Hydrology

Preface 121
Pedotransfer functions: bridging the gap between available basic soil data and missing soil hydraulic characteristics
J.H.M. Wösten, Y.A. Pachepsky and W.J. Rawls 123
Description of the unsaturated soil hydraulic database UNSODA version 2.0
A. Nemes, M.G. Schaap, F.J. Leij and J.H.M. Wösten 151
ROSETTA: a computer program for estimating soil hydraulic parameters with hierarchical pedotransfer functions
M.G. Schaap, F.J. Leij and M.T. van Genuchten 163
Testing soil water retention estimation with the MUUF pedotransfer model using data from the southern United States
W.J. Rawls, Y. Pachepsky and M.H. Shen 177
Using microscope observations of thin sections to estimate soil permeability with the Kozeny–Carman equation
M.G. Schaap and I. Lebron 186
Pedotransfer functions for estimating saturated hydraulic conductivity: implications for modeling storm flow generation
J.A. Sobieraj, H. Elsenbeer and R.A. Vertessy 202
